SUPPLEMENTARY INFORMATION:

Background

Codex was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure that fair practices are used in trade.

The AFTF is responsible for:

- (a) The development of guidelines, intended for governments on how to apply the existing Codex risk assessment methodologies to the various types of hazards related to contaminants/residues in feed ingredients, including feed additives used in feeding stuffs for food producing animals. The guidelines should include specific science-based risk assessment criteria to apply to feed contaminants/residues. These criteria should be consistent with existing Codex methodologies. The guidelines should also consider the need to address the establishment of rates of transfer and accumulation from feed to edible tissues in animal-derived products according to the characteristics of the hazard.
- The guidelines should be drawn up in such a way as to enable countries to prioritize and assess risks based upon local conditions, use, exposure of animals and the impact, if any, on human health.

(b) Develop a prioritized list of hazards in feed ingredients and feed additives for governmental use. The list should contain hazards of international relevance that are reasonably likely to occur, and are thus likely to warrant future attention. In doing so, due consideration should be given to the prioritized list of hazards as recommended by the FAO/WHO Expert Meeting on Animal Feed Impact on Food Safety. Clear criteria should be used to prioritize the list of hazards and take account of the potential transfer of contaminants/residues in feed to edible animal products (e.g. meat, fish meat, milk and eggs).

The Committee is hosted by Switzerland.

Issues to be Discussed at the Public Meeting

The following items on the agenda for the 7th Session of the AFTF will be discussed during the public meeting:

- Matters referred to the AFTF by Codex and other Codex committees and task forces
- Report on activities of FAO, WHO and other international intergovernmental organizations
- Draft guidelines on application of risk assessment for feed

- Proposed draft guidance for use by governments in prioritizing the national feed hazards

Each issue listed will be fully described in documents distributed, or to be distributed, by the Secretariat prior to the meeting. Members of the public may access copies of these documents (see ADDRESSES).

Public Meeting

At the January 17, 2013, public meeting, draft U.S. positions on the agenda items will be described and discussed, and attendees will have the opportunity to pose questions and offer comments. Written comments may be offered at the meeting or sent to Daniel McChesney, U.S. Delegate for the 7th Session of the AFTF (see ADDRESSES). Written comments should state that they relate to activities of the 7th Session of the AFTF.
